

MediNotes Remote

Remote Access

MediNotes Remote makes it easy to publish applications to your network or the Web. MediNotes Remote is a server-based, ultra thin-client solution that eliminates the need for Citrix MetaFrame or Windows Terminal Services. It's optimized for reliable, secure, scalable application delivery to virtually any network-attached device, regardless of platform or operating system.

MediNotes Remote significantly lowers your Total Cost of Ownership by centrally publishing your applications, while leveraging existing network and management infrastructure. For maximum performance – and ease of deployment and maintenance – MediNotes Remote publishes only the application interface, not the entire desktop. With our near-zero-footprint clients, only the application interface is delivered over the network and displayed on the remote devices.

Reasons to consider MediNotes Remote:

- **Satellite offices** - Clinicians can run in real-time from the main database instead of synchronizing periodically.
- **Single-point Administration** - Since none of the client machines actually run the software, the server is the only device that must be upgraded to new versions.
- **Wireless Performance** - All of the processing is done on the server. Wireless bandwidth is drastically reduced.
- **Lower Hardware Requirements** - Again, since all of the processing is done on the server, less expensive older machines can be repurposed as MediNotes Remote stations.
- **Cross Platform Access** - Suddenly your Windows applications are now available on Macintosh and Linux terminals.

Product Capabilities

- Provides instant access to Windows applications from any device or platform, while retaining 100% of the application's features, functions and branding
- Eliminates the need for Citrix MetaFrame, Microsoft Windows Terminal Services, costly rewrites, add-ons or extensions
- Publishes one or more Windows applications, not the entire desktop
- Integrates fully with existing platforms and management infrastructure
- Reduces costs, improves security, and simplifies licensing

Product Features

- Server-based solution with near-zero-footprint clients
- High performance over low-bandwidth connections
- Secure operation using native server security and fully-encrypted connections
- Complete cross-platform compatibility
- Local printing, file access and clipboard support
- Session reconnect and shadowing

Competitive Analysis

MediNotes Remote, the Fast, Simple, Affordable Solution.

If you're looking for an easy, plug-and-play solution to Web-enable your applications, then the logical choice is MediNotes Remote. By eliminating the complexities and heavy licensing requirements of Citrix MetaFrame and Windows Terminal Services, MediNotes Remote provides a fast, simple and affordable solution specifically geared toward the small and medium business (SMB) market and departmental installations. And only MediNotes Remote provides a fully customizable solution with private labeling options, server and client SDKs, and product bundling. So go with MediNotes Remote. You'll lower your TCO and maximize your ROI.

Features and Functions	MediNotes Remote	MS Windows Terminal Services®	Citrix MetaFrame®
Application Publishing			
Publishes Windows applications	X	X	X
Publishes UNIX applications	X		X
Publishes Linux applications	X		
Remote Display			
Publishes entire desktop		X	X
Publishes single application	X	X	X
Publishes list of applications	X		X
Server Requirements and Operation			
Requires Windows Terminal Services		X	X
Separate instance of Windows OS for each session		X	X
Runs multiple sessions with single instance of OS	X		
Client Support			
Windows Client	X	X	X
UNIX Client	X		
Linux Client	X	X	X
Java Client	X		X
Protocol Efficiency			
Transmits commands, keyboard/mouse events only	X		
Transmits less efficient screen bitmaps		X	X
Ease of Use and Efficiency			
Easy to install, configure and manage	X		
Low memory and CPU usage	X		
Licensing			
Unrestricted concurrent licensing	X		
Restrictive, complex licensing (per user/per device)		X	X
Requires complex, multiple product licensing			X
Solution Focus			
Application-centric solution (fast, simple, affordable)	X		
Restrictive solution		X	
Complex "infrastructure" solution			X
